

STAINLESS STEEL 1.4404 / TP 316 L AND ITS PROPERTIES

The steel with the material number 1.4404 is characterized by excellent resistance to various aggressive media, heat resistance and higher expansion. It is much more resistant, for example, when used in an environment with salt or acidic air. AISI 316 / 1.4404 has excellent mechanical and anti-corrosion properties even at extreme temperatures. 1.4404 is easy to process, has increased ductility and better formability, and is easy to weld.
